Mackay, member of congress from South Carolina, who died at the age of 65 years, took place from her late residence, 1423 Corcoran street, yesterday afternoon. Rev. R. R. Shippen conducted the services in a most impressive manner. The pallbearers were Mr. S. Cummins, Mr. H. M. Baker, Mr. H. B. Bennett, Dr. J. E. Mason, Gen. J. C. Crittenden, Mr. W. P. ASSISTANT ENGINEER IN REVENUE MARINE SERVICE.

The attorney general has given an opinion that the appointment of assistant engineers in the revenue marine service is vested in the President, and not in the secretary of the treasury, and that such appointments are subject to confirmation by the senate. This decision will have the effect of placing assistant engineers in the revenue marine service upon the same footing as commissioned officers in that service. In accordance with this opinion the President has made the following appointments: Horace C. Whitworth and Frank R. Randall, first assistant engineers; and Daniel T. Cross, Paul Barnes, S. B. McLennan, Charles F. Nash, and E. A. Jack, second assistant engineers.

The following are the names of the persons selected by the President as a Board of Visitors to the Naval Academy this year: Mr. Eldridge G. Lapham, United States Senate, New York; Mr. Johnson N. Camden, United States Senate, West Virginia; Mr. Alfred C. Harner, House of Representatives, Pennsylvania; Mr. Thomas Updegraff, House of Representatives, Iowa; Mr. Roger Q. Mills, House of Representatives, Texas; Rear Admiral John C. Howell, Major General Irwin McDowell, Mr. Edward V. Kinley, West Point, N. Y.; Rev. John W. Dismore, Bloomington, Ill.; General Anson G. Cook, New York; Professor George Isham Riche, Philadelphia; Dr. Samuel Abbott Green, Boston, Mass.

SCHOLARSHIP AND DISCIPLINE.

Secretary Chandler has written a letter to General McDowell requesting the latter to visit the Academy in connection with Rear Admiral Howell and Edward V. Kinley, between the 20th of May and the meeting of the Board of Visitors, June 1, for the purpose of informally inquiring—first, whether the standard of scholarship adopted is too high, and second, whether the discipline during the past year has been too severe. These questions will be specially called to the attention of the Board of Visitors, and the department wishes the gentlemen above named to make this preliminary informal visit in order that they may be able to report to the Board when it meets the result of their observations and inquiries.

The editor has just received the sad intelligence of the death of his aged father, Eida John, which occurred yesterday morning, at his home near Sterling, Illinois. Having lived an exemplary and useful life, we have the consolation of feeling that, whatever the realities of the future existence may be, he will enjoy an eternity of rest and peace.—Elizabeth City Carolinian.

The recent rains did other things besides washing away bridges, and the same Yarkin that swept the lowlands clean, caused a wedding supper to turn cold and a waiting bride to weep. Miss Ella Melchor, of Albemarle, was to have been married last Wednesday evening to a young man from Davidson county, and at the appointed hour, the bride was duly attired, the guests assembled and the supper was waiting, but the groom came not, and after waiting until a late hour, the guests dispersed, leaving the supper untouched and the bride in tears. It was learned afterwards that the groom had started out to be married, but the swollen Yarkin cut him off and he went up and down his banks in the vain effort to get across. The river eventually held him in check and prevented the wedding from proceeding.—Journal Observer.

Two years ago an enthusiastic sportsman, of Canada, noted for his powers of endurance in the saddle, but that he could ride from Quebec to Chicago and back without losing a day. He accomplished the feat. A few months past he laid a wager that he could make the journey on horseback from Quebec to Patagonia, the desolate land at the extreme southern part of South America, so familiar to the school boy. The bet was taken and additions made until the sum was increased to \$5,000 a side. Nine weeks ago the daring rider started and on Saturday he reached Raleigh, going due south. Brooded by exposure, he was the picture of healthy manhood. He was very reticent and only by accident was it discovered that he was the party in question. He expects to reach Patagonia, on the same horse he now rides, about September, 1884, but will have to run the gauntlet of more wild beasts than were ever seen in any menagerie, as well as crocodiles, snakes, cowboys, Indians &c., besides chills and fever, miasma, yellow fever, &c. His motto he declares is "onward."—News & Observer.

AN ENTERPRISING COLORED MAN.

Several of our colored citizens of late have commenced business for themselves, becoming tired of being dependents upon others, and some of them are showing enterprise and ability in the management of their affairs. We are glad to note among the leaders Mr. R. L. Hutchins; he has been for some time engaged in the wood and hay trade, and by strict attention to business has made a success of it, and now he has constructed a lighter with a house on it for the transportation of hay. The house will protect the hay from the weather and will prove very beneficial to our farmers. Mr. Hutchins is a man of integrity and enterprise and we have no doubt but what he will make a successful business man. We hope to note other enterprises by our colored friends in the near future.

Western N. C. Insane Asylum.

For those interested we clip the article below from the Journal Observer. We are requested to say that patients carried to the Western N. C. Insane Asylum at Morganton, without first obtaining permission from the Superintendent to be carried there, and complying with the law and regulations, will not be admitted. The law requires that about 100 patients, who have heretofore been confined in the Asylum at Raleigh, shall be the first to receive accommodations at Morganton. After that number is provided for the authorities of the Asylum at Morganton will use every exertion possible to take as many of the outside insane as they can. The Superintendent and directors sympathize very much with the demands made upon them for admission, but they are doing all that is possible to do under the circumstances. But remember not to carry any one to the Asylum, expecting admission, without first making the required arrangements with Dr. Murphy, the Superintendent.

The last invention is a machine to play a piano. This is too utterly awful.

Address W. P. CANADAY, Wilmington, N. C.

Maj. W. A. Hearne, of New Bern, was in the city on Tuesday and Wednesday last, prospecting. He contemplates putting a fine side-wheel steamer on the river between Wilmington and Smithville for the summer travel. He says the vessel will make about twelve miles per hour, and will accommodate about 400 people entirely comfortable. There can be no doubt that such a boat, besides, exceedingly, on the river, would be a great improvement on the question.

United States Court.

The U. S. District Court convened here on Tuesday morning last, Hon. A. S. Seymour presiding. Hon. W. S. O'Brien and Willis Bagley prosecuting officers, and Marshal Hill with all of his colored deputies were on hand keeping order and serving papers. The court was short, owing to the fact the district attorney had his officers ready and shored matters through in a business like way. For the first time in many years the United States is represented by a district attorney who has the business capacity and energy to perform the duties with satisfaction.

MRS

THE WILMINGTON POST.

WILMINGTON, N. C.

SUNDAY MORNING, MAY 6, 1883.

Do We Eat Too Much.

The amount of nourishment which a person needs greatly depends on his constitution, state of health, habits, and work. A sedentary man requires less than one whose duties demand the exercise of his muscles, and a brain worker needs more than an idler. But unquestionably the majority of us take more than we need. Indeed, food and work are distributed most unequally. The man of leisure is also the man of means, and, accordingly, fares sumptuously every day; while the laborer, toils for ten hours, and finds it difficult to get enough to repair the waste of his tissues. Yet a Chinaman or a Bengalee will toil under a tropical sun, and find a few pieces of rice or jowah sufficient to sustain his strength. A Frenchman will not eat half what an Englishman engaged in the same work will demand, and a Spanish laborer, content in ordinary times with a watermelon and a bit of black bread, will toil in the vineyards and grow fat on a diet of onion porridge and grapes. It is true that Mr. Brassey, when building the continental railways, found that one English navy was worth a couple of spare fed foreigners. But, on the other hand, the British Columbian and California gold diggers, than whom a more magnificent set of athletes does not exist, live in the remote mountains of the far west, mainly on beans flavored with a few cubes of pork. But they also obtain the best of water and the purest of air, and their out door and active exercise enable them to digest every ounce of their frugal fare. The English soldiers, though better fed than those of any army except the American do not get one-half the amount of solid nutriment which the idler of club loungers considers indispensable for his sustenance. An athlete in training is allowed even less food; yet he prospers on the limited fare, and prolongs his life by the regime to which he has been subjected. King Victor Emanuel was a monarch of the most robust physique; yet he only ate one meat per day, and it is manifestly absurd for any man to require three more or less weighty meals, and an afternoon cup of tea, to support the exertion of walking to the club, riding an hour in the park, writing a note or two, and dancing a couple of miles around a ball room. The ancients had their "amphitheatrum" or "gladiatorial arena," by which they regulated their indulgence at table. The moderns have not even this, but they have their gout and their livers to warn them, when it is too late, that nature has been overtaxed.

The Usual Result.

It is not to be denied that a good sewing machine is one of the most important appurtenances of the modern household.

We thought we had a good machine in our household until one day the agent of the *New Home* presented himself at our door and proceeded to deliver an oration upon its characteristic merits.

"But," we answered, "our machine serves us nicely and suits us well, and we do not care for another."

The agent, however, begged the privilege of leaving one of his machines with us, "for the ladies to try." The request was not unreasonable, so we granted it—but more to oblige the agent than anything else; for we really did not want the machine, and had not the remotest idea of buying it.

The machine once in the house, it was natural that the ladies should look it over, they did so, and as a consequence fell in love with it. They say that not the slightest wish to do away or disparage any other machine, this, all things considered, is, in their opinion, the most desirable one to be had.

The upshot of the whole matter was that the old machine was disposed of, and the "Light-Running New Home" installed in our household. It is pronounced a genuine beauty and a real comfort, and "our folks" wanted us to tell other folks about it.

This unrivalled machine is manufactured by the NEW HOME SEWING MACHINE CO., 30 Union Square, New York, who wish us to say that all who will send for their new illustrated catalogue and enclose their advertisement (printed on another page), will receive a set of fancy advertising novelties, of value to those collecting cards, &c.

Advice to Mothers.

Are you disturbed at night and broken of your rest by a sick child suffering and crying with pain of cutting teeth? If so, send at once and get a bottle of *Mrs. Winslow's Soothing Syrup* for Children's Teething. Its value is incalculable. It will relieve the poor little sufferer immediately. Depend upon it, mothers, there is no mistake about it. It cures dysentery and diarrhoea, regulates the stomach and bowels, cures wind colic, softens the gums, reduces inflammation, and gives tone and energy to the whole system. *Mrs. Winslow's Soothing Syrup* for Children's Teething is pleasant to the taste, and is the prescription of one of the oldest and best female physicians and nurses in the United States, and is for sale by all druggists throughout the world. Price 25 cents a bottle.

"A coffin," said the Irishman, "is the place where a man lives when he is dead."
The Egyptian obelisk in New York can't endure our climate, and is to be enclosed in glass.
